Specyfikacja

- three-piece boom
- hydraulic quick coupler
- 112 kW motor
- shear/hammer hydraulics
- digging bucket
- steel tracks
- insert width 600mm
- central lubrication

OPIS PRODUKTU

The 2002 **Liebherr R924HDSL** crawler excavator is a sturdy machine weighing 24 tons and with 17,000 hours of operation. It is equipped with a 112 kW engine, as well as a triple-breaking arm and a hydraulic quick coupler, which allows for the efficient replacement of attachments. The machine has hydraulics suitable for operating a shear or hammer and a digging bucket. Stability is ensured by steel tracks with 600 mm wide plates. Another advantage is the central lubrication system, which improves maintenance of the machine.
