OPIS PRODUKTU

The 2019 **Yanmar/Terex TC125** crawler excavator is a modern 12-ton machine with 2,318 engine hours. It is powered by an 85 kW Deutz TCD 3.6 L4 engine. It is equipped with a triple-break arm and a Lehnhoff hydraulic quick coupler, which makes it possible to change attachments quickly and conveniently. The machine has hydraulics suitable for operating a shear or hammer, a digging bucket and a rectangular blade. Stability is provided by steel tracks. Additional equipment includes a rear-view camera, cab guard, central lubrication system, radio, heating, air-conditioning and working lights to enhance operator comfort and safety.
